INDEX TO VOLUME 24 1989

Index to authors and contributors

APPAVOO, T. *Paper* On the effect of key edge shape on keyway edge stresses in shafts in torsion, 121

BEAUMONT, P. W. R. *Paper* The failure of fibre composites: an overview, 189
BROOKFIELD, D. J. *Paper* The use of a Bree simulation to investigate strain accumulation in 316 stainless steel at temperatures between room temperature and 500°C, 95
BYUN, J.-H. *Paper* Modelling and characterization of textile structural composites: a review, 253

CARPENTER, W. C. *Communication* Goland and Reissner were correct, 185
CHARRIER, J.-M. *Paper* Free and constrained inflation of elastic membranes in relation to thermoforming – non-axisymmetric problems, 55
CHOU, T.-W. *Paper* Modelling and characterization of textile structural composites: a review, 253
CURTIS, P. T. *Paper* The fatigue behaviour of fibrous composite materials, 235

EARMME, Y. Y. *Paper* A method for the measurement of residual stresses using a fracture mechanics approach, 23
ECONOMIKOS, L. *Paper* Imaging and photo-occlusion colour films for quantitative strain and stress analysis, 1
ETEMAD, M. R. *Paper* An investigation of the effects of end boundary conditions on cracked plates in tension, 7

FESSLER, H. *Papers* Plastic–elastic strains in two-dimensional sections of partial-penetration fillet welds, 15. On the effect of key edge shape on keyway edge stresses in shafts in torsion, 121

GOWHARI-ANARAKI, A. R. *Paper* Stress concentration factors and elastic–plastic stress and strain predictions for axisymmetric internal projections on hollow tubes subjected to axial loading, 45
GU, X. R. *Paper* The effect of resin properties on the strength of filamentary structures, 107

HARDY, S. J. *Paper* Stress concentration factors and elastic–plastic stress and strain predictions for axisymmetric internal projections on hollow tubes subjected to axial loading, 45
HERAKOVICH, C. T. *Paper* Edge effects and delamination failures, 245
HILLS, D. A. *Paper* Stress intensity calibrations for closed cracks, 37
HOSE, D. R. *Paper* Laminated pipe bends of mixed wall construction subjected to an in-plane bending moment, 127
HYDE, T. H. *Paper* Photoelastic determination of mixed-mode stress intensity factors for inclined semi-circular cracks in thin tubes, 83. *Conference Report* Applied Solid Mechanics – 2, 115

JI, X. *Paper* The effect of resin properties on the strength of filamentary structures, 107
JONES, F. R. *Paper* The role of moisture diffusion and matrix plasticisation on the environmental stress corrosion of GRP, 223
JONSSON, M. *Paper* A force transducer based on measurement of mean strain in a compact body, 31

KANG, K. J. *Paper* A method for the measurement of residual stresses using a fracture mechanics approach, 23
KHAN, I. A. *Paper* A comparative study of two experimental techniques for the measurement of residual stresses in circular rods and tubes of perspex, 163
KITCHING, R. *Paper* Laminated pipe bends of mixed wall construction subjected to an in-plane bending moment, 127

LAI YUNLIN *Paper* A photoelastic investigation of the elastic–plastic strain distribution around slits in various thin plate metal materials, 151
LINK, R. E. *Paper* Holographic measurement of the elastic–plastic boundary surrounding cold-expanded holes, 103
LU, T. J. *Paper* The effect of resin properties on the strength of filamentary structures, 107

MITTAL, R. K. *Paper* A comparative study of two experimental techniques for the measurement of residual stresses in circular rods and tubes of perspex, 163
MORETON, D. N. *Paper* The use of a Bree simulation to investigate strain accumulation in 316 stainless steel at temperatures between room temperature and 500°C, 95

NIKBIN, K. M. *Paper* Influence of net section damage on creep crack growth, 75
NISHIDA, K. *Paper* Influence of net section damage on creep crack growth, 75
NOWELL, D. *Paper* Stress intensity calibrations for closed cracks, 37

PAPPALETTERE, C. *Paper* Plastic–elastic strains in two-dimensional sections of partial-penetration fillet welds, 15
PARAMASIVAM, P. *Paper* Strain distribution in steel base plates under eccentric loads, 173

SANFORD, R. J. *Paper* Holographic measurement of the elastic–plastic boundary surrounding cold-expanded holes, 103
SHRIVASTAVA, S. *Paper* Free and constrained inflation of elastic membranes in relation to thermoforming – non-axisymmetric problems, 55
SNELL, C. *Communication*, 119
SONG, J. H. *Paper* A method for the measurement of residual stresses using a fracture mechanics approach, 23
STANLEY, P. *Communication*, 119
STROZZI, A. *Paper* Mechanical analysis of an annular plate subjected to a transverse concentrated load, 139
SUNDIN, K. G. *Paper* A force transducer based on measurement of mean strain in a compact body, 31

TALREJA, R. *Paper* Damage development in composites: mechanisms and modelling, 215
THAMBIRATNAM, D. P. *Paper* Strain distribution in steel base plates under eccentric loads, 173

WARRIOR, N. A. *Paper* Photoelastic determination of mixed-mode stress intensity factors for inclined semi-circular cracks in thin tubes, 83
WEBSTER, G. A. *Paper* Influence of net section damage on creep crack growth, 75
WILLIAMS, J. G. *Paper* The fracture mechanics of delamination tests, 207
WU, R. *Paper* Free and constrained inflation of elastic membranes in relation to thermoforming – non-axisymmetric problems, 55

YIP, Y. J. *Communication*, 119

Subject Index

A comparative study of two experimental techniques for the measurement of residual stresses in circular rods and tubes of perspex, *Paper*, 163
A force transducer based on measurement of mean strain in a compact body, *Paper*, 31
A method for the measurement of residual stresses using a fracture mechanics approach, *Paper*, 23
A photoelastic investigation of the elastic–plastic strain distribution around slits in various thin plate metal materials, *Paper*, 151
An investigation into the effects of end boundary conditions on cracked plates in tension, *Paper*, 7
annular plate subjected to a transverse concentrated load, mechanical analysis of, 139
Applied Solid Mechanics – 2, *Conference Report*, 115
Axial loading, 45
Axisymmetric internal projections, 45

Base plates, steel, 178
Bending moment, in-plane, 127
Bree simulation, 95

Circular rods, perspex, measurement of residual stresses in, 163
Closed cracks, 37
Cold-expanded holes, elastic–plastic boundary surrounding, 103
Compact body, 31
Composite materials, 189, 207, 215, 223, 235, 245, 253
Composites:
  damage development in, 215
  structural, 253
Corrosion, stress, 223
Cracked plates in tension, 7
Cracks:
  closed, 37
  semi-circular, 83
Creep crack growth, 75

Damage development in composites: mechanisms and modelling, *Paper*, 215
Delamination failures, 245
Delamination tests, fracture mechanics of, 207

Eccentric loads, 173
Edge effects and delamination failures, *Paper*, 245
Effects of end boundary conditions on cracked plates in tension, investigation of, 7
Effect of resin properties on the strength of filamentary structures, 107
Elastic membranes, free and constrained inflation of, 55
Elastic–plastic boundary, holographic measurement of, 103
Elastic–plastic strain distributions around slits in various thin plate metal materials, photoelastic investigation of, 151
Elastic–plastic strain predictions, 45
Elastic–plastic stress predictions, 45
End boundary conditions, effects of, on cracked plates in tension, 7
Environmental stress corrosion of GRP, role of moisture diffusion and matrix plasticisation in, 223
Experimental techniques for the measurement of residual stresses in circular rods and tubes of perspex, comparative study of, 163

Fatigue behaviour, 235
Fibre composites, failure of, 189, 207, 215, 223, 235, 245, 253
Fibrous composite materials, fatigue behaviour of, 235
Filamentary structures, strength of, 107
Fillet welds, partial-penetration, 15
Force transducer, 31
Fracture mechanics approach, 23
Fracture mechanics of delamination tests, 207
Free and constrained inflation of elastic membranes in relation to thermoforming – non-axisymmetric problems, *Paper*, 55

Goland and Reissner were correct, *Communication*, 185
GRP, 223

Holes, cold-expanded, 103
Hollow tubes, 45
Holographic measurement of the elastic–plastic boundary surrounding cold-expanded holes, *Paper*, 103

Imaging of photo-occlusion colour films for quantitative strain and stress analysis, *Paper*, 1
Inflation:
  constrained, 55
  free, 55
Influence of net section damage on creep crack growth, ***Paper*****, 75**
Internal projections, axisymmetric, 45

Key edge shape, effect of, 121
Keyway, edge stresses in, 121
Laminated pipe bends of mixed wall construction subjected to an in-plane bending moment, *Paper*, 127
Load:
  concentrated, 135
  eccentric, 173

Materials, composite, 189, 207, 215, 223, 235, 245, 253
Matrix plasticisation, 223
Mean strain, measurement of, 31
Measurement of residual stress, 23
  experimental techniques for, 163
Mechanical analysis of an annular plate subjected to a transverse concentrated load, *Paper*, 139
Mechanisms of damage development in composites, 215
Membranes, elastic, 55
Mixed-mode stress intensity factors, photoelastic determination of, 83
Modelling and characterisation of textile structural composites, a review, *Paper*, 253
Modelling of damage development in composites, 215
Moisture diffusion, 223
Moment, bending, 127

Net section damage, 75

On the effect of key edge shape on keyway edge stresses in shafts in torsion, *Paper*, 121

Partial-penetration fillet welds, two-dimensional sections of, 15
Perspex, circular rods and tubes of, 163
Photoelastic determination of mixed-mode stress intensity factors for inclined semi-circular cracks in thin tubes, *Paper*, 83
Photoelastic investigation of elastic–plastic strain distribution, 151
Photo-occlusion colour films, imaging of, 1
Pipe bends, laminated, of mixed wall construction, 127
Plastic–elastic strains in two-dimensional section of partial-penetration fillet welds, *Paper*, 15
Plate, annular, 139
Plate materials, thin metal, 151
Plates:
  base, 173
  cracked, 7

Quantitative strain and stress analysis, 1

Residual stresses, 23
  measurement of, 163

Semi-circular cracks, inclined, 83
Shafts in torsion, keyway edge stresses in, 121
Simulation, Bree, 95
Slits in thin plate metal materials, elastic–plastic strain distribution around, 151
Stainless steel, 95
Steel base plates, strain distribution in, 173
Strain accumulation, 95
Strain analysis, 1
Strain distribution, elastic–plastic, 151
Strain distribution in steel base plates under eccentric loads, *Paper*, 173
Strains, plastic–elastic, 151
Strength of filamentary structures, effect of resin properties on, 107
Stress analysis, 1
Stress concentration factors and elastic–plastic stress and strain predictions for axisymmetric internal projections on hollow tubes subjected to axial loading, *Paper*, 45
Stress corrosion of GRP, environmental, 223
Stress intensity calibration for closed cracks, *Paper*, 37

Stress intensity factors, mixed-mode, 83
Stresses:
edge, 121
residual, 23, 163
Structural composites, textile, 253
Structures, filamentary, 107

Tension, 7
Textile structural composites, modelling and characterisation of, 253
The effect of resin properties on the strength of filamentary structures, *Paper*, 107
The failure of fibre composites: an overview, 189
The fatigue behaviour of fibrous composite materials, *Paper*, 235
The fracture mechanics of delamination tests, *Paper*, 207
The role of moisture diffusion and matrix plasticisation on the environmental stress corrosion of GRP, *Paper*, 223
The use of a Bree simulation to investigate strain accumulation in 316 stainless steel at temperatures between room temperature and 500°C, *Paper*, 95
Thermoforming, 55
Thin plate metal materials, slits in, 151
Thin tubes, semi-circular cracks in, 83
Torsion, shafts in, 121
Transverse concentrated load, 139
Tubes:
hollow, 45
perspex, 163
thin, 83
Two-dimensional sections of partial-penetration fillet welds, plastic–elastic strains in, 15

Welds, fillet, 15
